## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2, 6, 10-15 of U.S. Patent No. 11/138,409. Although the conflicting claims are not identical, they are not patentably distinct from each other because the wording appears to be minor variations within the purview of the art.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1-3, 7-9, 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Osawa et al.

Osawa et al discloses a method for producing a magnetic recording medium including a smooth coating layer thickness, surface roughness, protrusion number and height as claimed (col 6, lines 45-50; col 8, lines 45-59).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-6, 10, 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osawa et al in view of Ryoke et al.

Osawa et al discloses what is described the 35 U.S.C 102 rejection above.

Osawa et al does not explicitly disclose coating solution containing a compound explicitly as radiation-curable or ultraviolet-curable.

Ryoke et al discloses coating solution containing a compound explicitly as "radiation-curable" or "ultraviolet-curable" (col 9, lines 8-37).

It would have been obvious to one with ordinary skill in the art to include coating solution containing a compound explicitly as "radiation-curable" or "ultraviolet-curable" because Osawa et al and Ryoke both teach resins for coating to produce magnetic recording mediums.

7. Claim 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osawa et al in view of Yamazaki et al.

Osawa et al discloses what is described the 35 U.S.C 102 rejection above.

Osawa et al does not explicitly disclose a non-magnetic layer with thickness as claimed, or wet-on-wet coating.

Yamazaki et al discloses disclose a non-magnetic layer with thickness as claimed (col 11, lines 54-64; col 19, lines 19-28), or wet-on-wet coating (col 8, lines 15-34).

It would have been obvious to one with ordinary skill in the art to include a non-magnetic layer with thickness as claimed because Yamazaki et al teaches multi-layer a alternative techniques (col 19, lines 10-18).

It would have been obvious to one with ordinary skill in the art to include wet-on-wet coating because Yamazaki et al teaches alternative coating techniques for producing a magnetic recording medium (col 8, lines 15-34).

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
